This is the revision B version of the <u>Switch8 RoboBrick</u>. The status of this project is that it has been <u>replaced</u> by the <u>revision C</u> version.

# **Switch8 Robobrick (Revision B)**

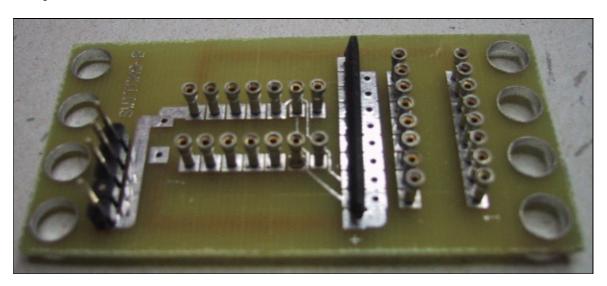

# **Table of Contents**

This document is also available as a PDF document.

- 1. Introduction
- 2. Programming
- 3. Hardware
  - ♦ 3.1 Circuit Schematic
  - ♦ 3.2 Printed Circuit Board

- 5. Issues

### 1. Introduction

The Switch8 RoboBrick allows you to read up to 8 digital inputs. An interrupt can be generated on the states of selected inputs.

# 2. Programming

The basic operation is to send a query to the Switch8 RoboBrick to read the 8 bits of data. The programmer can download a complement mask to cause any of the bits to be complemented prior to reading.

The Switch8 RoboBrick supports <u>RoboBrick Interrupt Protocol</u>. The interrupt pending bit is set whenever the the formula:

 $L\&(\sim I) \mid H\&I \mid R\&(\sim P)\&I \mid F\&P\&(\sim I)$ 

is non-zero, where:

### Switch8 RoboBrick (Revision B)

- I is the current input bits XOR'ed with the complement mask (C)
- P is the previous value of I
- L is the low mask
- H is the high mask
- R is the raising mask
- F is the falling mask

#### and

- ~ is bit—wise complement
- | is bit-wise OR
- & is bit-wise AND

Once the interrupt pending bit is set, it must be explicitly cleared by the user.

The Switch8 RoboBrick supports both the standard shared commands and the shared interrupt commands in addition to the following commands:

Command	Send/	Byte Value						ıe		Ī	D: .
	Receive	7	6	5	4	3	2	1	0	,	Discussion
Read Inputs	Send									Return input values abcdefgh (after XOR'ing	
	Receive	a	b	c	d	e	f	g	h		
Read Complement Mask	Send	0	0	0	0	0	0	0	1	Return complement mask ccccccc	
	Receive	c	c	c	c	c	c	С	c		
Read Low Mask	Send	0	0	0	0	0	0	1	0	<i>)</i> <sub>T</sub>	Return low mask <i>lllllllll</i>
	Receive	l	l	l	l	l	l	l	l	Keturii iow mask uuuu	
Read High Mask	Send	0	0	0	0	0	0	1	1	Return high mask <i>hhhhhhhh</i>	
	Receive	h	h	h	h	h	h	h	h	ı	Tretuin nign mask <i>mmmmm</i>
Read Raising Mask	Send	0	0	0	0	0	1	0	0	<u>,</u>	Return raising mask <i>rrrrrrr</i>
	Receive	r	r	r	r	r	r	r	r	₫	
Read Falling Mask	Send	0	0	0	0	0	1	0	1		Return falling mask ffffffff
	Receive	f	f	f	f	f	f	f	f	1	
Read Raw	Send	0	0	0	0	1	0	0	0		Return raw data <i>abcd</i> (without XOR'ing with complement mask)
	Receive	a	b	c	d	e	f	g	h	,	
Set Complement Mask	Send	0	0	0	0	1	0	0	1	ַן,	Set complement mask to ccccccc
	Send	c	c	c	c	С	c	c	c		
Set Low Mask	Send	0	0	0	0	1	0	1	0	١,	Set low mask to <i>llllllll</i>
	Send	l	l	l	l	l	l	l	l	_	
Set High Mask	Send	0	0	0	0	1	0	1	1	_ ,	Set high mask to <i>hhhhhhhh</i>
	Send	h	h	h	h	h	h	h	h	!	
Set Raising Mask	Send	0	0	0	0	1	1	0	0	ı],	Set raising mask to rrrrrrr
	Send	r	r	r	r	r	r	r	r		
Set Falling Mask	Send	0	0	0	0	1	1	0	1	_ [	Set falling mask to ffffffff
	Send	f	f	f	f	f	f	f	f		oct ranning mask to jijjijjij
Read Interrupt Bits	Send	1	1	1	0	1	1	1	1	$\int$	

### Switch8 RoboBrick (Revision B)

	Receive	0	0	0	0	0	0	e	p	Return the interrupt pending bit $p$ and the interrupt enable bit $e$ .
Set Interrupt Commands	Send	1	1	1	1	0	c	c	c	Set Interrupt Command ccc.
Shared Commands	Send	1	1	1	1	1	c	c	с	Execute Shared Command ccc.

# 3. Hardware

The hardware consists of a circuit schematic and a printed circuit board.

## 3.1 Circuit Schematic

The schematic for the Switch8 RoboBrick is shown below:

The parts list kept in a separate file — switch8.ptl.

## 3.2 Printed Circuit Board

The printed circuit board files are listed below:

switch8 back.png

The solder side layer.

switch8 front.png

The component side layer.

3. Hardware 3

#### switch8 artwork.png

The artwork layer.

#### switch8.gbl

The RS-274X "Gerber" back (solder side) layer.

#### switch8.gtl

The RS-274X "Gerber" top (component side) layer.

#### switch8.gal

The RS-274X "Gerber" artwork layer.

### switch8.drl

The "Excellon" NC drill file.

#### switch8.tol

The "Excellon" tool rack file.

# 4. Software

The Switch8 software is available as one of:

### switch8.ucl

The µCL source file.

### switch8.asm

The resulting human readable PIC assembly file.

#### switch8.lst

The resulting human readable PIC listing file.

#### switch8.hex

The resulting Intel<sup>®</sup> Hex file.

### 5. Issues

The following fabrication issues came up:

- The holes for N1 are too big (size 3) and need to be made smaller (size 2).
- It would be nice to label the switches.
- Think about rotating the microcontoller by 90 degrees.
